

CLEANING & MAINTENANCE

Caring for and cleaning your Chieftain Vinyl is easy. Simply follow the steps below to keep your product looking attractive, clean and stain free.

1. Remove day to day dirt and residue with warm soapy water and a clean soft cloth.

2. Follow this with a clean water rinse and dry with a soft cloth or towel.

3. For heavy or ingrained soiling, follow steps 1 & 2 above, then scrub the affected area using a soft brush and warm soapy water.

4. If disinfection is necessary, clean the surface of the vinyl with a 5% solution of bleach in water and a damp cloth, followed by a clean water rinse and dry.

Undiluted bleach or cleaning products used contrary to manufacturers instructions should never be used directly on the fabric. Continued use of bleach may lead to discolouration of fabric. This may compromise the fabric and forfeit your warranty.
